# CONPACK HIGH PERFORMANCE FLIGHT PACKS

14.8V

Lithium Ion batteries are not stranger to the RC & FPV scene. They have been around for years, specially for those who like to DIY.

Most pilots are very familiar with the advantages and disadvantages of Li-ions but it's also know that the advantages for FPV pilots (specially long rangers) are way more than the shortcomings.

With a well planned power setup, this packs can give you up to double the flight time you will get with a similar Li-Po battery, not to mention that they're lighter (considering weight vs mAh) and safer as well.

All in all, Lithium Ion batteries are here to stay and are our personal choice when it comes to power.

So why is ZOHD bringing you these packs now? Well, because we've been using them long enough to be sure they'll deliver what you're expecting to see. This is what we use, and now we want to let all our pilots have access to HIGH QUALITY professionally made packs.

The key words here are TIME and VALUE: Just to mention a few...

- \* The TIME (and money) you save researching and trying to find the right cells on a market PACKED with FAKES.
- ★ The TIME you save soldering and fiddling around with sketchy packs that can be invested in actually going out and flying your plane.
- ★ The VALUE of a professionally made pack, that is not gonna blow up mid-flight sending you on a search and rescue operation for your expensive FPV rig :)
- **★** The VALUE of having a company that will give you 100% support 24/7.
- **\*** The VALUE of the extra goodies you'll get with the pack. Check them out.

#### **SPECS:**

Cell Model: SANYO NCR18650GA Capacity: 3500mAh Nominal Voltage: 7.4V Constant current: 1550mA Maximum Charge Voltage: 4.2V per cell Max. Charge Current: 3.2A End voltage: 2.5V per cell Maximum Continuous Discharge Current: 10A Weight: 108g/3.81oz Dimensions: 70mm \* 38mm \* 19.4mm Power Lead: 100mm / 3.94in XT30 Balance Lead: 40mm / 1.57in XH2.54

LITHUM ION BAT

ASID

#### **SPECS:**

Cell Model: SANYO NCR18650GA Capacity: 3500mAh Nominal Voltage: 14.8V Constant current: 1550mA Maximum Charge Voltage: 4.2V per cell Max. Charge Current: 3.2A End voltage: 2.5V per cell Maximum Continuous Discharge Current: 10A Weight: 210g/7.41oz Dimensions: 72mm \* 38mm \* 38mm Power Lead: 100mm / 3.94in XT60 Balance Lead: 40mm / 1.57in XH2.54

#### **FEATURES:**

- **\*** Original brand-new SANYO high quality cells.
- **★** ZOHD Lionpack batteries will never puff and become unsafe like a Li-Po.
- **★** ZOHD Lionpack batteries can be charged from empty or nearly full without damaging the pack.
- ★ ZOHD Lionpack batteries can be charged over 350 times and still store 85% of its original capacity.
- **\*** High quality fireproof heat shrink outer skin.
- **\*** Double heat shrink over XT terminals for extra protection.
- **\*** Compact size.
- **\*** Light weight.
- Extra XT30-DC2.5 Converter (2S version), now you can power your FPV goggles with the same pack!
- ★ Ideal power solution for all RC hobby products, including RC cars, boats, etc...
- **\*** Extra balance charger protector, don't kill your charging wires!
- ★ Extra RED/GREEN XT30/60 Protector, protect your connector and show you the energy status at any time... basic but very useful.
- **★** Extra ZOHD battery strap and Velcro to keep those batteries in place.

# Available models: (more coming soon!)
