

## USER MANUAL

### Product warranty:

The products of our company will strictly abide by the relevant laws issued by the country, follow the specific terms and relevant provisions of the "regulations on the liability of repair, replacement and return of commodities of microcomputer", and stipulate the company's after-sales service.

**Service term:** our company promises the good quality of the new product. If the product fails to run during normal use within 7 days from the date of sale, consumers can choose to return the product, replace it or repair it with free of charge. Customers can be free of charge after the normal use of one-year failure. For consumers who are not satisfied with the free replacement or free warranty service, our company still provides technical services, and collects material fees when repairing or replacing parts.

The purchase time shall be subject to the date of purchase invoice or receipt issued by the dealer.

Guarantees are not available for any of the following situations:

All damages caused by human factors, including operation in abnormal working environment, do not following the instructions or using in the environment not according to the instructions, etc.

The users disassemble the machine, repair and reft by himself without the company's consent.

Damages caused by bad transportation after purchase

Damages caused by other irresistible factors (e.g. flood, lightning, earthquake, abnormal voltage)

Normally worn and cracked, rusted or Impregnated.

Products not owned by the company (such as fake products).

Customers cannot show valid purchase certificate, no warranty card.

**Warranty procedures:** If the customer fails to use the machine after purchase, he/she should bring the receipt or invoice to the dealer for the warranty service matters. If the problems are not properly solved, please call our customer service department.

### Product operation:

**Doorbell:** when the visitor presses the doorbell button, the indoor device will ring "ding dong", the screen will open automatically, and the indoor user can see the visitor outside the door.

**Taking photos outdoor:** when visitors press the doorbell button, photos with dates will be saved in the TF card.

**Taking photos indoor:** when the indoor machine shows the visitor, the user can press the button on the main machine to take a picture.

**Video recording:** setting the recording function in menu. When there is a visitor, it will start to record automatically.

**Playback:** users can view photos or videos on "Image recording" and "photo recording" in the main menu.

Long pressing the "menu/confirm" button to play video in the submenu. You can delete what you don't need.

**Turn off:** long press the shutdown button for more than 3 seconds to turn off.

### Installation guide:

**Step 1:** tear off the anti-theft glue of the outdoor unit, select proper screws and screw them on the guide rod, and insert the guide rod into the hole on door.

**Step 2:** tear off anti-theft glue of the indoor iron, thread the wire into the square hole of the iron plate, connect the iron plate and the guide bar with screws, then screwing them tightly, please keep the iron plate hook up.

**Step 3:** Insert the FPC cord connector correctly to the FPC seat of the indoor part, with the arrow head downward.

**Step 4:** fix the indoor machine on the metal plate.

**Step 5:** Insert the lithium battery into the indoor machine battery box with the correct direction.

Double check if the FPC connector is properly connected to the equipment. Press the doorbell button outside the door for testing.

**Step 6:** Insert the blank memory card and use it after formatting. It is recommended to use the original brand memory card above CLASS4.
