## Product Function

### 1.UVA Sterilization

This product uses Philips DUV chip to sterilize, UVA to inhibit bacteria.

The sterilization rate is as high as 99.99%.

UVA Sterilization Opening Methods:

- Press the power button to start. Sterilization will stop automatically after 2 minutes.
- The sterilizer sterilizes automatically eight times a day, one minute each time.

Automatic sterilization time as follows:

AM	5:00	7:00	9:00	11:00
PM	17:00	19:00	21:00	23:00

**\*To avoid UVA radiation, sterilization is done only when no one is near.**

### 2.Time adjustment

You need to set the machine time when you get it at first time.

Set hours: Long press the top button "H", the screen displays "08:--" to enter the hour setting mode. Then, press "H/M" to add or subtract. Long press the top button "H" again to confirm the completion of the setting.

Set minutes: Long press the top button "M", the screen displays "--:08" to enter the minute setting mode. Then, press "H/M" to add or subtract. Long press the top button "M" again to confirm the completion of the setting.

### Battery Indicator

This product has the reminder function of power shortage, charging process and charging completion.

- The charging icon on the screen flashes when someone is near the device whose power is below 20%.
- The charging icon on the screen lights up when the device is charging.
- The charging completion icon lights up after the charging is completed.

The device is equipped with a Type-C data cable, which can be charged with a phone charger plug or a charger bank. It can be fully charged after about 4 to 6 hours.
