K-1028E

Universal air conditioner remote control operating instructions

Product characteristics

K-1028E universal air conditioner remote control, basically can remote control most of the brands and models of air conditioner at home and abroad. Has brand point-to-point speed fast searching function, far enough from launch, set up easy, simple operation, novel appearance, comfortable nature, bring you endless convenient enjoyment. uses the large screen LCD display, make your Settings, operating at a glance, built-in clock electric heating and timing on/off function, and add lighting features, bring you more convenient!

Panel description

Avoid setting function

Electricity on a remote control can control the mainstream brands on the market: Gree (YBDF2), Sanlingzhonggong 388, Midea, Toshiba, Chunlan, Haier, Hualing, etc.

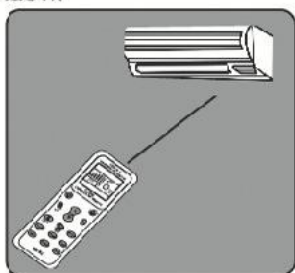

Setting of the remote control

There are four set the remote control method (A, B, C, D), please choose one

A Brand point-to-point speed quick search

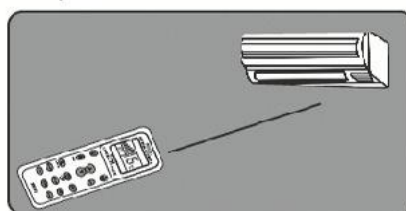

1

Manually open the air conditioner power supply, the remote control on the air conditioner receiving window.

2

Corresponding you hold down the brand of "code" button, the code is shown "----" and flashing, until the air conditioner "di", automatically opens, loosen the key, set up complete.

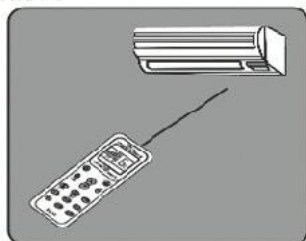

Multifunctional brand of table

 ON/OFF	 TEMP	 TEMP	 FAN	 MODE	 LEE ON
GREE/HAIER	CHANGHONG/MIDEA	CHIGO/AUX	CHUNLAN/AUCMA	HISENSE/KELON	HABAO/OTHERS
 Around wind	 TIME.ON	 TIME.CFF	 COOL	 HEAT	 TIME
TOU/HUALING/SHANGJING	MTSUASH/SHARP	TOSHIBA/SANY/NEC	LG/SAMSUNG	Hitachi/Panasonic	Electolux/FUJITSU

B Digital automatic search suitable model

1

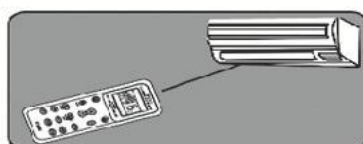

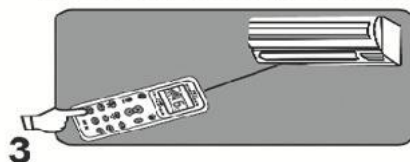

Manually open the air conditioner power supply, the remote control on the air conditioner receiving window.

Test keys function is correct, if correct, the code is valid, if not correct please repeat step 2

2

Press "set" key not to put until the code is shown "-" and flashing into fast search suitable model state at this time, pay close attention to the status of your air conditioner, until the air conditioner automatically open, let go "set" key to stop the search.

C Human input code method

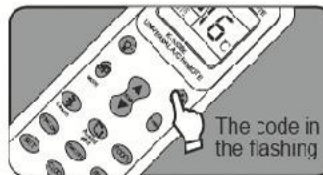

1

Manually turn on air conditioning power, from the last page "code table" find out what you want to remote control models of the air conditioner, and find out the first code. For example, Haier 020-037

2

Press "set" key not to put (about 5 seconds), the model for the code in a window blink when loosening, press the "temperature▲" or "temperature▼" key, until the required code displayed on the window and flashing; such as code correctly, air conditioning opens;

BRAND	CODE
HAIER	020-037

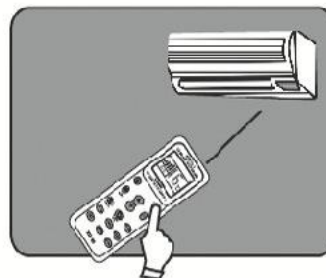

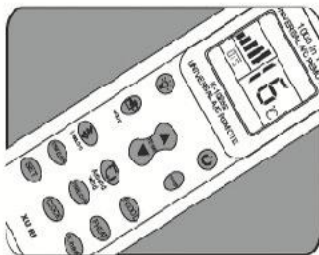

3

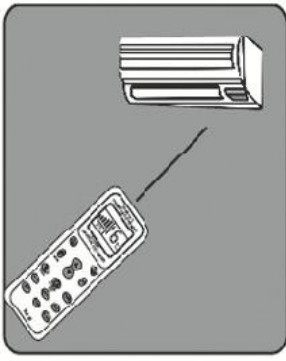

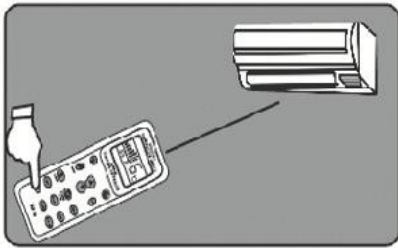

Press the "set" key, the selected model code will stop flashing,

4

Test the remote control button is valid, effective and set up. Invalid, repeat steps 2 to 3.

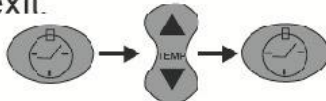

D Artificial search code method

1	2
Manually open the air conditioner power supply, the remote control on the air conditioner receiving window.	Press "set" key not to put (about 5 seconds), the model for the code in a window blink when loosening, According to the "temperature▲" key, pay close attention to the status of your air conditioner, until the air conditioner automatically open, according to the "set" key, and set up.
	

Set the clock function

Press the "clock" button (about 3 seconds) clock, is the state of the clock setting. Use "temperature▲" or "temperature▼" to adjust the current time, press again "clock" button to exit.

Time switch machine function

Equipped with the original remote control timing function, press the "timing" or "regular shutdown boot" key after, the air conditioner will light up regularly, said has entered the status regularly.

✘ Some timing boot function is in shutdown state.

Lighting function

In normal mode by pressing the "light" button lights 15 seconds press button automatically quit not lighting.

Pay attention to

- Make sure your air conditioner receiver is normal.
- When you prepare for long-term not use the remote control, please take out the battery.
- The improper operation of the remote control, likely disorder, internal program at this time, you just remove the battery, wait for after 35 minutes, remounted can normal use.
