

Upgrade	L026	L026-II	Explanation
Cassette			Upgraded to Shimano cassette for quieter ride and more precise shifting.
Cable			The PVC cable is upgraded to Teflon integrated cable, which is more convenient for maintenance, high temperature resistance and more stable communication.
Motor			The 350W three-blade magnesium alloy one-wheel motor is upgraded to a 500W twelve-blade magnesium alloy one-wheel motor.
Display			The LCD liquid crystal instrument is upgraded to TFT color screen liquid crystal instrument, and the display is clearer.
Booster			The 5-magnet split booster has been upgraded to a 12-magnet integrated booster, with a simpler appearance, enhanced waterproofing, 2.4 times the boost signal, faster boost response, and smoother riding.
