

组装前请认真阅读本说明书

Please read this manual In its entirety before attempting to assemble the model.

Panyu®

No:10137003

E-fair

注意事项

- 本遥控模型不是玩具。
- 在第一次组装前认真阅读和充分理解说明书内容。
- 为了能够正确组装该模型，首次购买模型者，应向有组装和操纵经验的人士请教。
- 工具和零件必须放在安全的地方以免儿童和他人接触到，造成不必要的意外和损失。
- 飞行前检查周围是否有无线电干扰，并且遵守国家无线电管理条例。
- 请检查本包装内的所有零部件，如有缺少或损坏，请与经销商及时联系。
- 由于气候、温度、湿度等客观环境的变化，模型的蒙皮可能会出现松弛的现象,请用电熨斗隔着一层布对蒙皮加温以使其复原(注意熨斗的温度不要过高,以免烫伤蒙皮)

Notice!

- This remote-control model aircraft must not be considered to be a toy for safety's sake.
- Prior to beginning the assembly process, read the comprehensive instruction manual from cover to cover to understand the model's construction details.
- If the modeler is to be successful in assembling the model accurately it is advice that the modeler seek the help of an expert, or at least an individual with prior modeling experience.
- All tools and hardware must be used in a safe manner to avoid injury to the modeler
- Prior to performing the first flight with your new model aircraft, it is strongly advised the modeler contact their national model aviation sporting organization for a complete set of use guidelines and proper flight procedures.
- Upon opening the kit it is recommended that the modeler examine the package contents to determine that all the aircraft's pertinent parts are included and no damage to the contents has occurred. If a problem with the kit exists please contact your local dealer for replacement or exchange.
- Notice the model's covering material may appear to sag or be wrinkled. This can result from ambient temperature change, the amount of humidity in the air, or because the covering has loosened during shipping. The covering can easily be retightened by use of a warm iron applied to the covering material until the wrinkles shrink. It is important to that if the iron is too hot, it will damage the cover or warp the model's airframe, so use iron carefully when retightening the preinstalled covering.

安装飞行所需的配件和工具 Accessories and Tools

遥控器
Radio

舵机
Servo

电机
Electric machinery

电子速调器
Electronic speed controller

电池
Battery

充电器
Charger

螺旋桨
Airscrew

整流罩
Spinner

速粘胶
Use the Royal
fast Adhesive

双组胶
Use A, B modified
acrylic adhesive

海绵
Sponge

锁带
Zoster

钢板尺
Steel ruler

裁纸刀
knife

套筒扳手
Plug wrench

卷尺
Tape measure

剪刀
Scissors

螺丝刀
Screwdriver

尖嘴钳
Nose pliers

老虎钳
Pliers

剪钳
Wire cutter

本说明书使用一些指示符号，它们的图形和含义如下：

Meaning of some signs used in:

特别注意
Special notice

按尺寸钻孔
Drill a hole

左右装配
Both Left side and right side

A、B胶粘接
Use A, B modified
acrylic Adhesive

遥控器配件
Radio accessory

用刀裁掉部分
Cut-off this part with

注意
Notice

需密切注意
Watch out!

速粘胶粘接
Use the Royal
fast adhesive

组件名称

Discreteness name

1 机身	Fuselage	8 自攻丝	Self-Tapping Screw
2 机翼	Wing	9 螺丝	Screw
3 平尾	Stabilizer	10 垫片	Plate
4 垂尾	Vertical Fin	11 舵角	Horn
5 翼尖	Wing tip	12 竹棒	Bamboo
6 快装接头	Linkage Stopper	13 插销	Bolt
7 铰链	Hinge	14 钢丝	Wire

Assemble wing 组装机翼

As pictures shows, cut hinge slots for the hinges on the wing and aileron with knife and glue them tightly.

如图所示,用小刀分别在机翼和副翼安装铰链的地方裁出开口,并用快干胶粘牢.

The installation is finished. .

安装完成图

Tight the wing and the aileron with the hinge, the aileron can move for free , otherwise, you would not control the model and may have accident during the flying.

一定要将铰链在机翼和副翼上粘牢,并保持副翼能灵活的摆动,否则将可能造成飞行中不能对模型进行操纵从而造成严重事故。

Assemble wing 组装机翼

Main Wing .
主翼.

Wing tip.
机翼翼尖

Put the bolt insert the wing, Make sure the main wing and the wing tip are absolutely anastomose, And then use the AB glue to glue them. (mention: glue the AB glue on the bolt, the both meet surface of the main wing and wing tip)

将插销插入机翼中,主翼和翼尖一定要前后,上下对齐再用AB胶粘接。
(注意:插销上插销内以及主翼与翼尖对接面都要涂有AB胶)

正面图
Front view

检验图
Inspection

Lay it as picture $A=A'$
安装完毕后如图放置. $A=A'$.

Glue the wood block which was used to fix the servo to the servo mount with AB modified acrylate adhesive.

根据舵机的大小, 在舵机框上固定舵机块, 并用A. B胶粘牢.

As the picture shows , fix the servo to the servo mount.

如图所示, 将舵机固定在舵机框上.

As the picture shows , install the servo to the inside of the wing, and join the servo line and the servo extension. then cross the servo extension through the hole to the middle part of the wing as show after connecting with the leading line.

将舵机安装至机翼内部, 并且将舵机线与延长线连接, 并且将舵机线与引导线连接好, 通过引导线将延长线穿至机翼中段。

Assemble wing 组装机翼

As picture shows, put the horn at the right place on the aileron, and make three marks.
如图所示, 将舵角放置在副翼合适的位置上, 并留下三个记号.

Make three-2mm holes at the marked places on the aileron, then use the screws to fix the horn.

然后在副翼上的三个记号上分别钻2mm的洞, 最后用螺丝固定.

As the picture shows, make the pushrod through the servo's arm.

将连杆按照图示舵角穿过舵机。

Fix the cover for servo with the self-tapping screw.

用自攻丝将舵机盖固定。

Fasten the steel clevis to the horn.

将钢夹头扣住舵角。

The horn installation is finished on the aileron.
副翼舵角安装完成。

注意

Watch out!

After the horn installation finished on the aileron, You must make sure the aileron turn freely.

安装副翼舵角完成后, 应确定副翼能转动自如。

Assemble empennage 组装尾翼

	5
	2
	6

As pictures shows, cut hinge slots for the hinges on the stab and elevator with knife.

如图所示,用小刀分别在平尾和升降舵上安装铰链的地方裁出开口, 安装铰链, 并且用快干胶粘牢。。

Tight the **Stabilizer (Vertical Fin)** and **Elevating (Roodder)** rudder with the hinge, **Elevating (Roodder)** rudder can move for free. Otherwise, you would not control the model and may have accident during the flying .

一定要将铰链在平(垂)尾和升降(方向)舵上粘牢, 升降(方向)舵又要能灵活的转动, 否则将可能造成在飞行中不能对模型进行操纵甚至造成严重事故。

Assemble empennage 组装尾翼

Top view
顶视图

Cut the cover along the line on the both side
沿着所画的线裁去蒙皮便于粘接

Glue stabilizer (Vertical Fin) on the fuselage with abglue, keep the stabilizer parallel with land, and vertical Fin perpendicular to fuselage. Otherwise, you would have accident during the flying.

用AB胶将平垂尾牢固的粘接到机身上,保持平尾与地面平行,垂尾与机身垂直.否则在飞行过程中将发生严重事故.

Inspection
检验图

Assemble empennage 组装尾翼

As picture, make marks for the horn on the stab and the Fin, and drill three-2mm holes on the marked place on stabilizer and vertical Fin.

如图所示,在平垂尾画的三个记号上分别钻一个2mm的洞。

As picture, fixed Horn.
如图所示,安装舵角。

As the pictures show, fix the horns to the stab and the fin, and install the rods cross into the horns.

如图所示,用螺丝将舵角固定在平尾和垂尾上,将连杆穿过舵角的小孔。

Assemble fuselage 组装机身

2

2

Cut off the unwanted arms on the servo. Install the linkage stopper to the arm. Install the arm to the servo.

裁去多余的舵机摇臂。将快装接头安装在摇臂上。将摇臂上安装在舵机。

Rudder rod
方向舵拉杆

Elevator rod
升降舵拉杆

As the picture shows, install the servo to the servo mount.

如图所示,将舵机安装在舵机框内。

Assemble fuselage 组装机身

As picture, put the motor into the fuselage, Fix it with screw.

如图所示, 将电机放入机身中.
用螺丝固定牢固.

As picture, Connect the electronic speed controller and the switch.

如图所示, 电子速调器与电源开关连接好.

As picture, put the electronic speed controller and battery into the fuselage.

如图所示, 把电子速调器和电池放入机身中.

Assemble fuselage 组装机身

Trim the canopy to the canopy pedestal. cut off the unwanted part, then glue the canopy to the canopy pedestal.

然后将机舱头罩与机舱底座对好大小后裁去多余部分,并用快干胶将两者粘牢.

Strill a hole at the front of the canopy pedestal, then put a bamboo stick into the holes.

将机舱底座前端钻个小孔,插一个小竹棒.

Put the bamboo into the hole at the front, install the canopy onto the fuselage.

将小竹棒对准机头的小孔,把机舱安装在机身上

Use the screw to fix them on the fuse.

用螺丝将机舱固定在机身上.

As the pictures show, install the canopy.

如以上图所示,将机舱安装好。

Assemble fuselage 组装机身

	2
	2
	4
	2

As the pictures show, install the bamboo sticks to the holes strilide at the former of the middle of the wing, and glue them firmly with the AB modified acrylic adhesive.

如图所示，将竹棒安装在机翼前沿中间已经开好的孔内的位置，并用AB胶粘牢。

As the picture shows, install the wing on the fuselage. Tith the wing with screws, check the wing and the fuselage' symmetuy, if have a error, please adjust the screw.

如图所示，将机翼安装在机身上，并用螺钉固定在机身上，检查机翼是否对称于机身。如有误差，应略为松开螺钉进行调整，然后拧紧螺钉。

As the picture shows, install the propeller on the modle.

如图所示，将螺旋桨安装到飞机模型上。

! 注意 Notice

1. Do not use the damaged propeller, or repaired with glue.
2. Make sure that installing the propeller firmly.

- 1 不能使用已经损坏或有裂纹的螺旋桨，即使是
用胶修复的也不能使用。
- 2 螺旋桨的安装必须牢固。

检测 Check

$$A = A' \quad B = B' \quad C = C'$$

垂直尾翼 Vertical fin

水平尾翼 Stabilizer

Check and adjust all servos before flying. Can consult the data of the sketch.

飞行前应对各舵的转动位置进行检查测量并作适当的调整，可参考图示数据进行。

The C.G. of the model should be located at 85mm to the leading edge of the wing. Battery should be placed between motor and receiver. Move the battery back and forth to adjust the C.G. position to 85 mm to the leading edge. Then fix it firmly to avoid losing. otherwise, the battery will move backward by inertia, causing the flight unstable because of the back moving of the C.G. Location.

模型的重心位置应在距机翼前缘85mm地方. 电池应放在电机和接收机之间, 移动电池前后位置, 调整模型重心位置在距前缘85mm的地方, 并且固定好, 不能前后移动, 如果固定不牢, 往往手掷放飞时, 电池因惯性向后移动, 重心靠后移, 使飞行不安定.

在调整和飞行过程中应密切注意的部分

In process of flight, these part should be noted carefully!

- 飞行前应确保飞行区域宽阔，无高压线及其他障碍物，起飞和降落跑道无砖瓦砾。
Make sure no high pressure electric wire or other barriers and the runway not having any other debris before to flight.
- 通过移动遥控器手柄检查升降舵、副翼和方向舵是否活动正确。
Check the elevator, aileron and rudder turning freely and carburetor switch neatly through the radio control rod.
- 确保机翼连杆和其他部件的正确安装
Make sure the wing rod and other parts installed correctly.
- 不能有同频率的遥控器械同时开机，以防造成事故
Do not turn on the switch of radio, exist at the same frequency to avoid an accident.
- 将遥控器的天线充分拉出，打开发射机开关，检查电池电量
Pull the radio antenna enough, turn on the transmitter switch, check the battery power.
- 当风速很大和侧风时请不要让您的飞机飞行
Do not fly the plane when the wind strong or crosswind.

重要警告 Warning!

油料应远离火源，妥善保管以防爆炸燃烧，造成极其严重的危害

The fuel should be put far away from the fire source, or it will cause serious accident.

禁止观看的人太接近飞机，禁止模型在人们头顶上方飞行

Forbid approaching to the model airplane. Prohibit flying above your head.

及时给发射机电源和接收机电源充电

Charge the battery of transmitter and receiver.

及时检查模型上的各个零件，是否有松动现象，到指定地点更换。

Check the accessories, if loose, change it at the appointed dealer.

注意事项

- 本遥控模型不是玩具。
- 在第一次组装前认真阅读和充分理解说明书内容。
- 为了能够正确组装该模型，首次购买模型者，应向有组装和操纵经验的人士请教。
- 工具和零件必须放在安全的地方以免儿童和他人接触到，造成不必要的意外和损失。
- 飞行前检查周围是否有无线电干扰，并且遵守国家无线电管理条例。
- 请检查本包装内的所有零部件，如有缺少或损坏，请与经销商及时联系。
- 由于气候、温度、湿度等客观环境的变化，模型的蒙皮可能会出现松弛的现象,造成机翼扭曲变形,请用电熨斗隔着一层布对蒙皮加温以使其复原（注意熨斗的温度不要过高，以免烫伤蒙皮）

Notice!

- This remote-control model aircraft must not be considered a toy for safety's sake.
- Prior to beginning the assembly process, read the comprehensive instruction manual from cover to cover to understand the model's construction details.
- If the modeler is to be successful in assembling the model accurately it is advice that the modeler seek the help of an expert, or at least an individual with prior modeling experience
- All tools and hardware must be used in a safe manner to avoid injury to the modeler.
- Prior to performing the first flight with your new model aircraft, it is strongly advised the modeler contact their national model aviation sporting organization for a complete set of use guidelines and proper flight procedures.
- Upon opening the kit it is recommended that the modeler examine the package contents to determine that all the aircraft's pertinent parts are included and no damage to the contents has occurred. If a problem with the kit exists please contact your local dealer for replacement or exchange.
- Note the model's covering material may appear to sag or be wrinkled. This can result from ambient temperature change, the amount of humidity in the air, or because the covering has loosened during shipping. The covering can easily be retightened by use of a warm iron applied to the covering material until the wrinkles shrink. It is important to know that if the iron is too hot it can damage the covering material or warp the model's airframe, so use caution and care when retightening the pre-installed covering.
