Product Parameters

Support customized service, please consult customer service for details.

JIKONG Product Specifications				
Technical Index	JK-B1A8S10P	JK-B1A8S20P	JK-B2A8S20P	JK-B2A8S30P
Number of Battery Strings(Li-ion)	3S-8S	3S-8S	3S-8S	3S-8S
Number of Battery Strings(LifePo4)	4S-8S	4S-8S	4S-8S	4S-8S
Number of Battery Strings(LTO)	6S-8S	6S-8S	6S-8S	6S-8S
Balance Method	Active Balance (Full State On)			
Balance Current	1A	1A	2A	2A
Conductive Resistance in Main Circuit	0.3mΩ	0.3mΩ	0.3mΩ	0.3mΩ
Continuous Discharge Current	100A	200A	200A	300A
Continuous Charge Current	100A	200A	200A	300A
Maximum Discharge Current (MAX 2min)	200A	300A	300A	400A
Over Charge Protection Current (ADJ)	10-100A	10-200A	10-200A	10-300A
Other Interfaces (Customized)	RS485	RS485	RS485	RS485
Other Interfaces (Customized)	CANBUS HEAT	CAN BUS HEAT	CANBUS HEAT	CANBUS HEAT
Size/mm	153*126*18mm			189*94*24mm
Wiring Output	Common Port			
Single Cell Voltage Range	1-5V			
Voltage Acquisition Accuracy	±5mV			
Over Charge Protection Voltage	1.2-4.35V Adjustable			
Over Charge Release Voltage	1.2-4.35V Adjustable			
Over Current Detect Delay	2-120S Adjustable			
Over Discharge Protection Voltage	1.2-4.35V Adjustable			
Over Discharge Release Voltage	1.2-4.35V Adjustable			
Quantity of Temperature Detection	1Pcs			
Temp Protection	Yes			
Short Circuit protection	Yes			
Coulomb Counter	Yes			
Bluetooth Function	Support for Android IOS			

Excellent balance effect

Comparison before and after balance (using 16-section 100AH series battery as an example)

Pressure difference before and after balance (V)	1S	2S	3S	4S	5S	6S	7S	8S
Before balance	3.896	3.894	3.877	3.846	3.902	3.892	3.844	3.962
After balance	3.791	3.796	3.791	3.796	3.795	3.796	3.794	3.796
Pressure difference before balance	0.639							
Pressure difference before and after balance (V)	1S	2S	3S	4S	5S	6S	7S	8S
Before balance	3.491	4.130	3.958	3.957	3.865	3.778	3.575	3.573
After balance	3.792	3.799	3.800	3.799	3.796	3.795	3.794	3.790
Pressure difference before balance	0.01							

 **JIKONG | Official Store**

4S-24S 40-300A 12V 24V 48V 72V

Note: All accessories are not included in this list. Please purchase them separately if necessary.

Installation And Wiring

- 1.Connecting all the cables.
- 2.Insert the cable into the bms.
- 3.Connect the B-line and the P-line to the battery.

The wiring method of 8-string cells

The wiring method of 4-string cells

Rich interface to meet daily needs

More communication modes can be realized simultaneously through different interfaces on the BMS

ACCURATE ACCICICNT

Efficiently balance the cell voltage difference
battery performance

**Intelligent active balancing technology with
national patented technology**

**After active equalization, the battery has a longer lifespan
more stable performance, and is completely more reliable**

Intelligentization - Active balanced current
1A-2A intelligent adjustment, suitable for
low voltage battery charging.

Safety - Intelligent control ensures balanced
current, low power consumption, and low
heat generation, ensuring safety and reliability.

**Fully aluminum alloy shell Superior
heat dissipation effect**

The casing is made of aluminum alloy and adopts one-piece molding technology, with a high thermal conductivity of $<300(\text{W}/(\text{m}\cdot\text{K}))$.

The thermal conductivity of iron is only <60 (W/(m-K)).

The thermal conductivity of plastic is only >1 (W/(m-K)).

Aluminum shell adopts graphite thermal conductivity material to maximize the heat dissipation effect.

Aluminum shell surface spraying a layer of graphite material, so that the heat dissipation is more uniform, more balanced heat transfer.

High-quality appearance and High-efficiency performance of the BMS have achieved our high quality

Every part of the bms is carefully crafted.

Intelligent interaction and easy operation

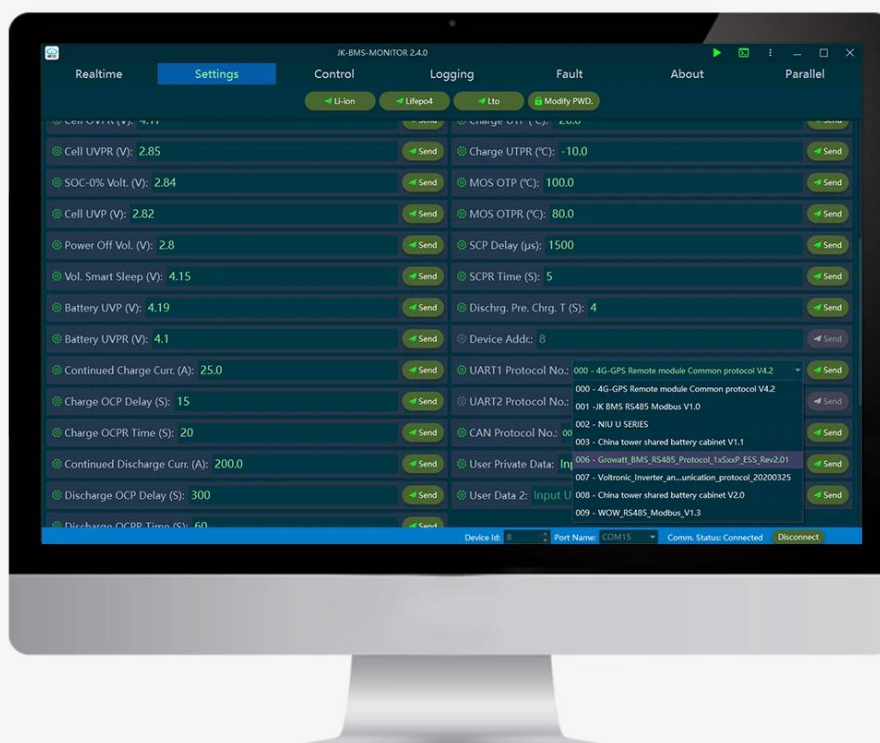

Freely adjust multiple protection values such as overcharge, overdischarge, overcurrent, temperature, and balance. If you need to adjust the parameters, please read the internal parameters of the protection board first, and then make changes.

With one click, you can view multiple information such as voltage, current, temperature, and number of strings.

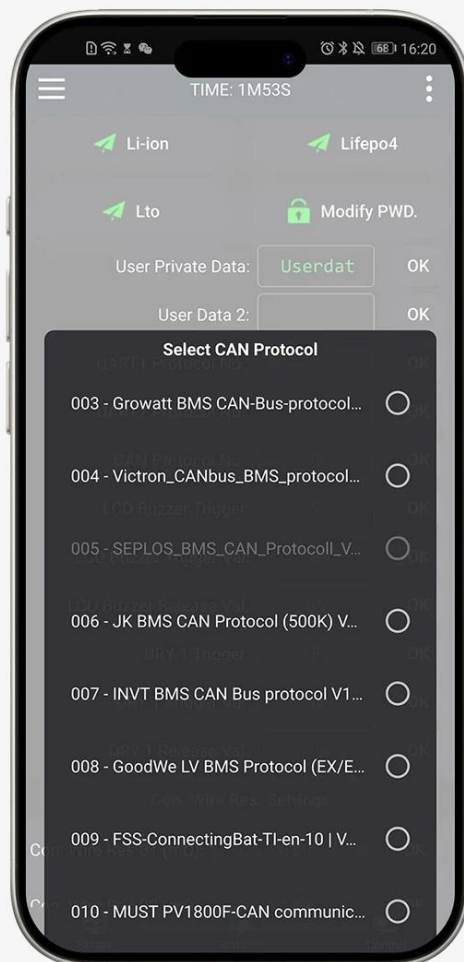

The inverter communication protocol can also be set through the host computer

Supported CAN Protocols		
Protocol Name		
JIKONG	NIU	China tower
Growatt	Volttronic	WOW

Protocol docking, fast and convenient

Compatible with mainstream inverter communication protocols in the market

it can be easily set up through the mobile APP

Supported CAN Protocols

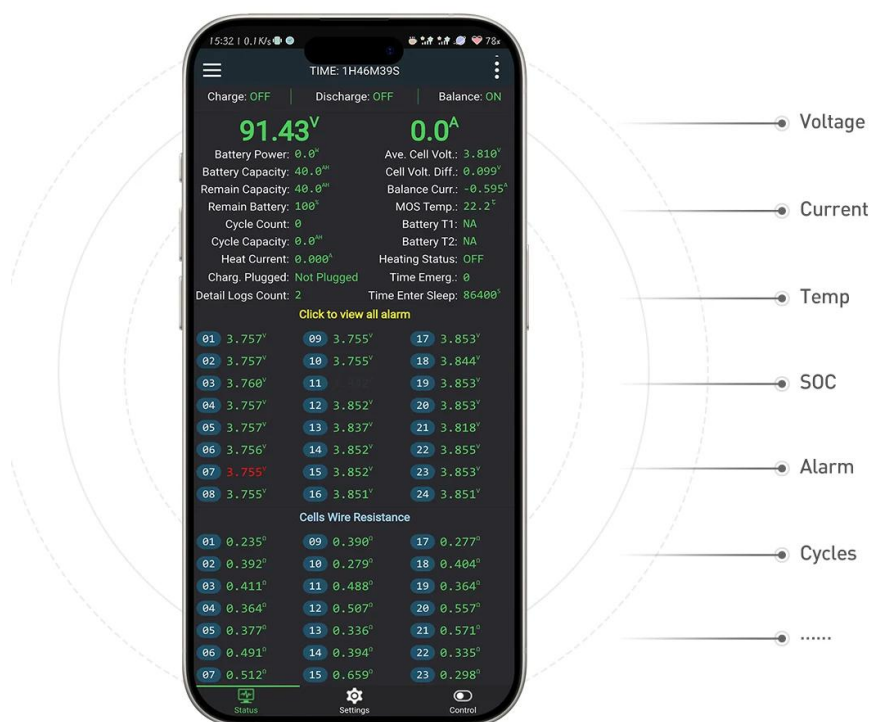

Protocol Name
Low-voltage hybrid inverter CAN communication protocol
PYLON CANBUS Protocol V1.2
Growatt xxSxxP ESS Protocol V2.01
CAB-BUS_BMS_Protocol_201707
INVT BMS CAN Bus protocol V1.02
GoodWe LV BMS Protocol (CAN) V1.7(For ES/EM/S-BP/BP Series)
FSS-ConnectingBat-TI-en-10 Version 1.0
PACE BMS Modbus Protocol for RS485

Multi-screen display, data connection

Mobile phone Bluetooth APP "JIKONG SMART BMS", a personal lithium battery steward installed in the mobile phone, all kinds of information are clear at a glance.

APP supports IOS/Android/HarmonyOS system installation

The APP supports multiple languages, which can be switched automatically with the mobile phone system

You can freely choose mobile APP, computer upper computer or home storage display according to actual needs.

Mobile APP

PC software

JIKONG home storage display

Active Balancing (Lossless Balancing)

Active Balancing is achieved through energy transfer, moving energy from cells with higher energy to cells with lower energy, achieving voltage balance with minimal energy loss.

JIKONG BMS Active Balancing Current 1A-2A

Active balancing operates whenever there is a voltage difference above the set threshold, regardless of whether the battery is charging, discharging, or idle. It works continuously until the voltage difference is within the set range.

Active balancing, involving energy transfer, does not generate heat, allowing for larger balancing currents. Typically, active balancing currents range from 1A to 2A.

Application scenarios-widely

Suitable for power lithium batteries, storage lithium batteries, outdoor batteries and other major application scenarios

E-bike

Electric Tricycle

Low Speed Quad

Forklift

Cleaning Car

Tourist Car

Industrial Drone

Scooter

RV Energy Storage

Lithium battery

Power Bank

Storage battery
