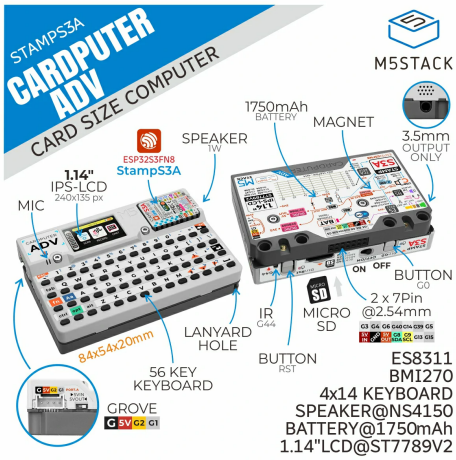
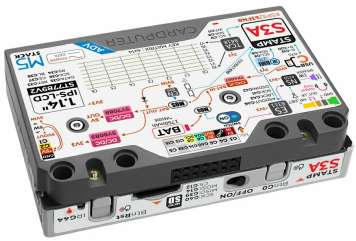
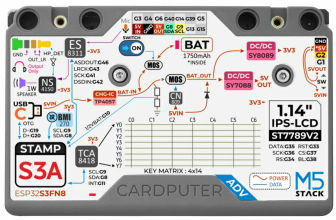
Cardputer-Adv

SKU:K132-Adv







Description

Cardputer-Adv is a programmable card-sized computer powered by the Stamp-S3A core module (based on ESP32-S3FN8). It integrates a 1.14" LCD display and a 56-key minimalist keyboard for convenient interaction and input operations.
In terms of audio, it features an ES8311 audio codec, a high SNR MEMS microphone, an NS4150B amplifier, and a 1W speaker, providing high-quality audio input and output capabilities. Additionally, it has a 3.5mm audio output jack for connecting external headphones or speakers. Internally, it is equipped with a 1750mAh high-capacity lithium battery, combined with a low-power design and an independent power switch to ensure good battery life. It integrates a 6-axis motion sensor BMI270, an infrared emitter, a microSD card slot, and also provides an HY2.0-4P Grove port and an EXT 2.54-14P expansion bus for connecting sensors and other peripherals. The base contains magnets for metal attachment and is compatible with LEGO hole extensions. This product is suitable for quick function prototyping, industrial control, home automation, and other scenarios.

Tutorial

UiFlow2

This tutorial demonstrates how to control the Cardputer-Adv device with the UiFlow2 graphical programming platform.

Meshtastic Tutorial

This tutorial will introduce you to the operation method of using Meshtastic with Cardputer-Adv + Cap LoRa868.

Arduino IDE

This tutorial will introduce how to program and control the Cardputer-Adv device through Arduino IDE

Features

- Stamp-S3A core controller
- 56-key keyboard
- 1.14" LCD display
- 160gf comfortable keypress feel
- ES8311 audio codec
- High SNR MEMS microphone
- NS4150B amplifier + 1W speaker
- 3.5mm audio output interface
- Infrared emitter
- 6-axis motion sensor BMI270
- HY2.0-4P Grove port
- EXT 2.54-14P expansion bus
- microSD card slot
- Built-in 1750mAh Li-ion battery
- Magnetic back design
- LEGO hole compatible
- Development Platform
  - Arduino
  - UiFlow2
  - ESP-IDF
  - PlatformIO

Includes

- 1 x Cardputer-Adv

Applications

- Rapid prototyping and functional verification
- Industrial control and automation
- Embedded systems development and learning
- Wireless communication and IoT projects

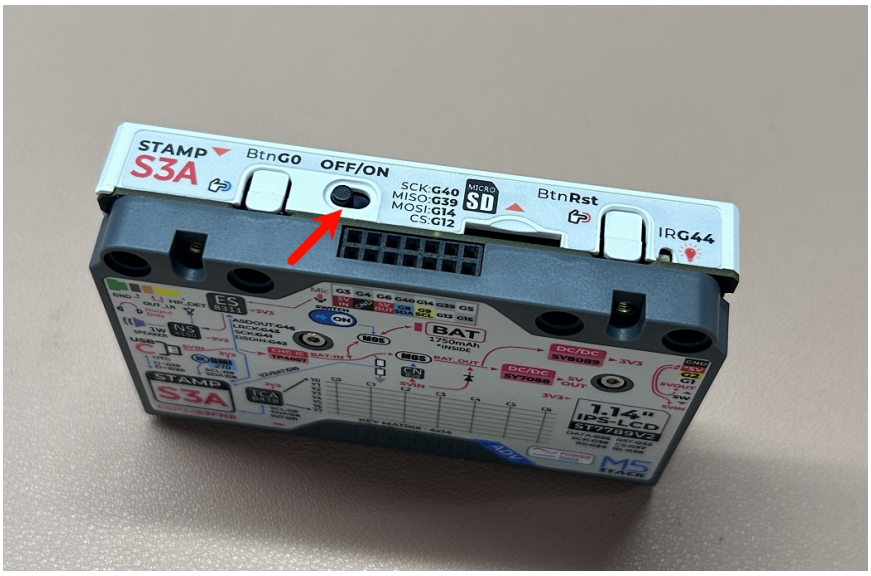
Specifications

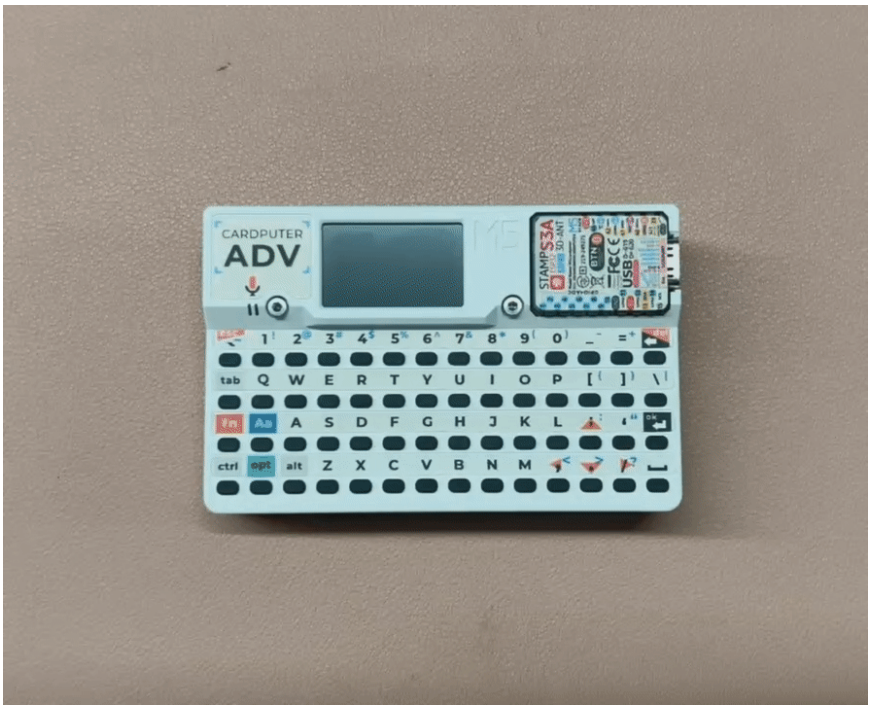
Specification	Parameter
SoC	ESP32-S3FN8 @ Dual-core Xtensa LX7, up to 240MHz
Flash	8MB
External Storage	microSD
Display	ST7789V2@1.14", 240 x 135px
Keyboard	56 keys (4 x 14)
Key Actuation	160gf
Expansion Ports	HY2.0-4P + EXT 2.54-14P
IR	1x IR emitter
Audio Codec	ES8311
Speaker	NS4150B amplifier + 8Ω@1W speaker
Microphone	MEMS microphone, SNR: 65 dB
IMU	BMI270
Battery Capacity	1750mAh
Operating Temp.	0 ~ 40°C
Product Size	84.0 x 54.0 x 19.6mm
Product Weight	81.0g
Package Size	145.7 x 95.0 x 20.7mm
Gross Weight	98.5g

Learn

Download Mode

To enter download mode, set the side power switch of the Cardputer-Adv to the `OFF` position. Then, before powering on, hold the `G0` button, apply power to the device, and release it afterward. The device will then enter download mode.





Charging Notes

When charging the Cardputer-Adv, please switch the power to `ON`.

Speaker Feature

> **Note**
>
> When a 3.5mm headphone jack is inserted, the speaker amplifier will be disabled.
